shamsPathan

Career Summary

Backend-focused Software Engineer with 6+ years of experience architecting and scaling secure, distributed systems in **Python**, **Go**, and **PHP**. Proven track record in building high-performance APIs, optimizing large-scale platforms (10M+ users at Grameenphone), and delivering enterprise-grade cloud-native solutions using Docker, Kubernetes, AWS, and GCP. Experienced in system design, application security, and performance optimization, with a passion for mentoring teams and contributing to open source. Familiar with modern LLM APIs and agentic workflow patterns, ready to drive innovation in AI-enabled SaaS platforms.

Technical Skills

Backend Engineering • Python • Golang • PHP8 • Laravel • CodeIgniter • Flight PHP • Gin • RESTful APIs • gRPC • Microservices • MySQL • PostgreSQL • Redis

Cloud & DevOps • Docker • Kubernetes • GitHub Actions • CI/CD • Linux • GCP (VM, AppEngine, CloudRun) • AWS (EC2, S3, IAM) • Cloud Security • OAuth2 / OpenID

AI & Distributed Systems • Agentic AI Workflows • LLM API Integration • OpenAI • Gemini • Workflow Orchestration • Distributed Systems

Frontend (Complementary) • VueJS • Angular • React • Bootstrap • TailwindCSS

Engineering Practices • System Architecture • OOP • Design Patterns • TDD • Secure Coding • Performance Optimization • Mentorship • Cross-Team Collaboration

Work Experience

Freelance Bugfix & Security Specialist

Mar 2025 – Present

Upwork (Remote)

Seasonal

- Architected and secured backend systems for international clients.
- Fixed critical production issues; extended complex features with scalable design.
- Optimized databases and backend code; conducted penetration testing.
- Mentored junior developers, improving engineering best practices across distributed teams.

Backend Developer

2024 – 2025

Brain Station 23 PLC — MyGP Team, Grameenphone

Dhaka, BD

- Developed and optimized large-scale telecom applications serving **10M+** users.
- Architected backend services in Golang and PHP; secured APIs and improved resilience under heavy traffic.
- Introduced **Kubernetes** deployments on **GCP**; enhanced monitoring and observability.
- Collaborated cross-functionally to deliver distributed features for internal and customer-facing platforms.

Backend Engineer, Application Security

2023 – 2024

Lomeyo LLC (Remote)

Remote

- Delivered secure and scalable backend systems in Go and PHP.
- Hardened APIs, optimized SQL queries, and automated deployments with CI/CD.
- Partnered with product teams to ensure compliance with enterprise security standards.

DevOps & Application Security (Intern)

2023

BitMascot Ltd (Remote)

Remote

- Built CI/CD pipelines with GitHub Actions and Docker.

- Assisted migration to microservices architecture; improved cloud deployments on AWS/GCP.
- Conducted application security audits.

Full Stack Engineer

2020 – 2022

Sylhet, BD

Sk Associates

- Designed and developed full-stack business applications using Go, PHP8, and JavaScript frameworks.
- Built REST APIs, secured authentication flows, and optimized backend performance.
- Provided technical leadership in architecture decisions; mentored junior engineers.

Full Stack Engineer

2019 – 2020

Dhaka, BD

Smart Software Ltd

- Delivered scalable SaaS solutions using Laravel and VueJS.
- Improved performance by refactoring legacy systems; optimized SQL queries.
- Implemented secure authentication flows.

Open Source Contributor

Ongoing

Community

laracom, nuxt3-notifications, chatgpt-client & others

- Contributed improvements in code quality, performance, and extensibility across community projects.

Key Projects

SurjyoPath — The Sun's Way

► [Link](#)

Personal knowledge universe reimaged as a living solar system. Built with React 19, TypeScript, Tailwind v4, Supabase, and Fireworks AI (AMD MI300X). *Technologies: React, TypeScript, Tailwind CSS, Supabase, Fireworks AI.*

MyGP App

► [Link](#)

Core telecom application used by 10M+ active users. Delivered new features, optimized performance, and ensured secure API integrations. *Technologies: PHP, Golang, JavaScript, Kubernetes, GCP.*

Online Ticketing Platform

► [Link](#)

Secure e-commerce ticketing system with payment gateway integrations (Cardstream API) and real-time booking. *Technologies: PHP8, Laravel, Angular PWA, MySQL, Google APIs.*

Event Booking Platform

► [Link](#)

Scaled SaaS platform for managing virtual and in-person events. Improved SQL query performance, optimized API layer, and secured payment flows. *Technologies: PHP, JavaScript, MySQL, CakePHP.*

Food Delivery Web App (UK Market)

Architected and deployed a food delivery system with real-time order tracking and custom order workflows. *Technologies: PHP, CodeIgniter, VueJS, MySQL.*

E-commerce Platform

► [Link](#)

Built and optimized a scalable online marketplace with secure checkout and inventory management. *Technologies: Laravel, VueJS, MySQL.*

Vehicle Routing System

► [Link](#)

Engineered routing engine and APIs to calculate shortest and fastest vehicle routes across the UK. Added driver tracking with distributed API design. *Technologies: Golang, React, PostgreSQL, PGRouting, GCP.*

Live Chat Application (Offline SaaS)

Multi-tenant live chat system with white-label integration for client websites. Real-time communication and scalable deployment. *Technologies: Node.js, Angular/Ionic, MongoDB, Firebase.*

Education

Diploma in Computer Science & Engineering

2017

Sylhet Polytechnic Institute, Sylhet

Certifications

Cloud & Deployment

App Deployment, Debugging, and Performance —
Google Cloud (2022)
Google Cloud Fundamentals: Core Infrastructure —
Google Cloud (2022)
Google Cloud Essentials — Google Cloud (2022)

Application & Server Security

CompTIA PenTest+ — TryHackMe (2022)
Jr Penetration Tester — TryHackMe (2022)
Pre-Security — TryHackMe (2021)
